

NEWS RELEASE for June 30, 2008

DR. THOMAS LIVERNOIS JOINS WORLD ENERGY SOLUTIONS' SCIENTIFIC ADVISORY PANEL

ST. PETERSBURG, Florida (June 30, 2008) World Energy Solutions, Inc. (OTC BB:WEGY.OB), a company focused on energy conservation technologies and environmental sustainability, announced that Dr. Thomas Livernois of Exponent, Inc. has joined World Energy Solutions' Scientific Advisory Panel. Dr. Livernois specializes in the analysis and design of electrical and electronic systems, including automotive and commercial vehicle systems. He will assist the Company in the continued development of its proprietary H2O Energy System.

"I am pleased to join the World Energy Solutions' Scientific Advisory Panel. Over the last year they have assembled quite an esteemed group of scientific minds," stated Dr. Livernois. "I am excited to assist in the continued development of their technologies. Not only do these new technologies offer the benefit of reduced fuel consumption, but they also represent a potentially major reduction in harmful emissions."

Tom Livernois has spent many years in the automotive industry, including with Ford Motor Company and Chrysler Corporation, where he specialized in the design and development of advanced electrical systems, electronic controls and semiconductors. He also worked with several OEMs and automotive component suppliers in the area of fuel delivery systems, which involved system level design enhancement systems for road and railroad propulsion applications. More recently, Dr. Livernois has been involved in the analysis of hybrid motor vehicle fuel systems.

Dr. Livernois's specific vehicle experience covers powertrain, chassis, and safety systems, including system performance in crashes and fires. Other areas of expertise include hybrid vehicle power train architectures and systems performance, electrocution risk assessment, electrical power distribution faults, and various electrostatic discharge phenomena. Dr. Livernois has also been involved with several intellectual property cases.

Dr. Livernois is a Principal Engineer in the Electrical and Semiconductors Practice at Exponent Inc. He is also a member of the Institute of Electrical and Electronic Engineers (IEEE), the Society of Automotive Engineers (SAE), the American Society of Mechanical Engineers, and (ASME) the Industrial Advisory Board for Lawrence Technological University.

About World Energy Solutions

World Energy Solutions, Inc. (OTC BB: WEGY.OB) is an Energy Services Company and electronics manufacturer. WES's primary business focus is the development of technology for lowering electrical, gas and water usage for commercial, government and residential facilities. As a pioneer in the manufacturing of the finest TVSS systems available in the market today, WES uses cutting edge technologies and unsurpassed design standards to provide its customers with full lifetime warranties on its products.

Forward-Looking Statements

Certain matters discussed in this press release are "forward-looking statements." These forward-looking statements can generally be identified as such because the context of the statement will include words such as "expects," "should," "believes," "anticipates" or words of similar import. Similarly, statements that describe World Energy Solutions' future plans, objectives or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties, including the financial performance of World Energy Solutions, which could cause actual results to differ materially from those currently anticipated. Although World Energy Solutions believes the expectations reflected in any forward-looking statements are based on reasonable assumptions, they cannot give any assurance that their expectations will be attained. Shareholders, potential investors and other readers are urged to consider these factors carefully in evaluating any forward-looking statements. Certain factors could cause results and conditions to differ materially from those projected in these forward-looking statements, and some of these factors are discussed below. These factors are not exhaustive. New factors, risks and uncertainties may emerge from time to time that may affect the forward-looking statements made herein. These forward-looking statements are only made as of the date of this press release and World Energy Solutions does not undertake any obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances.
